# Installation instruction for IntelliJ IDE EDU

Below is a step-by-step instruction on how to run tasks for a stand-alone session in IntelliJ IDE with EDU.

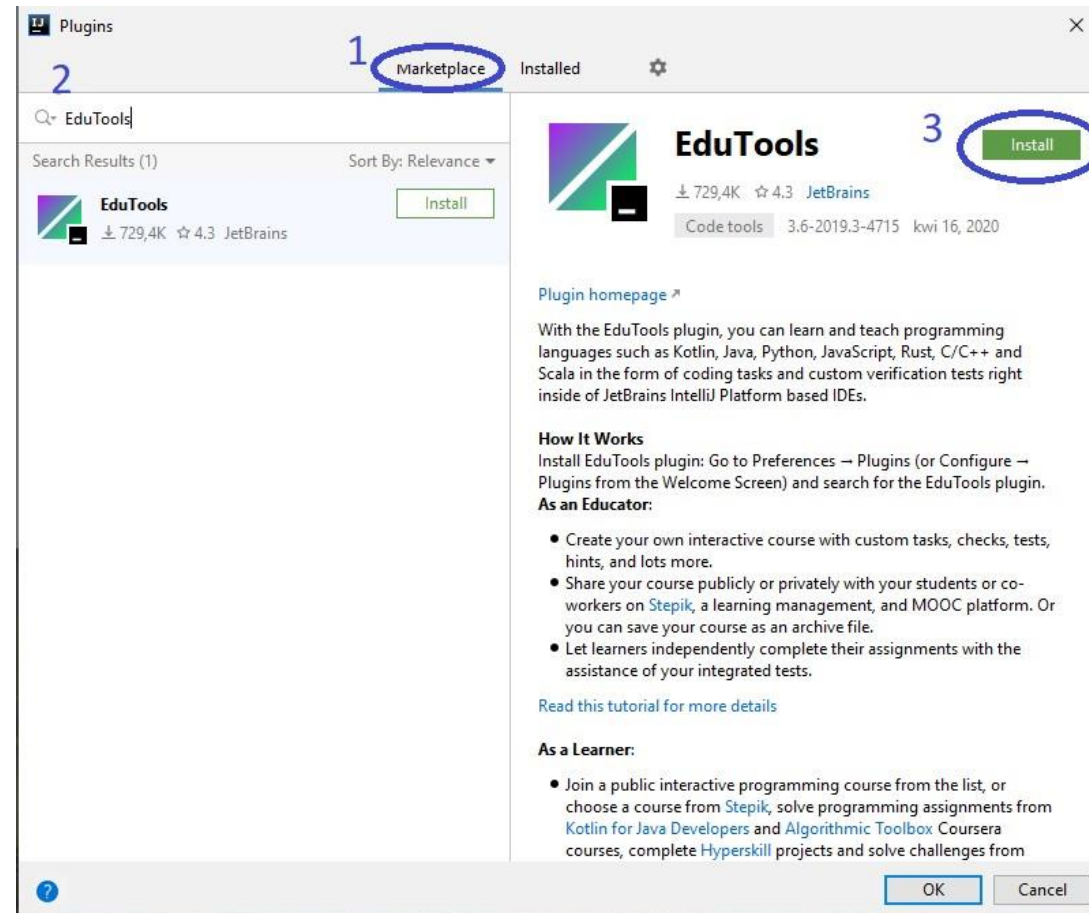

You need to run IntelliJ and choose *Configure*:

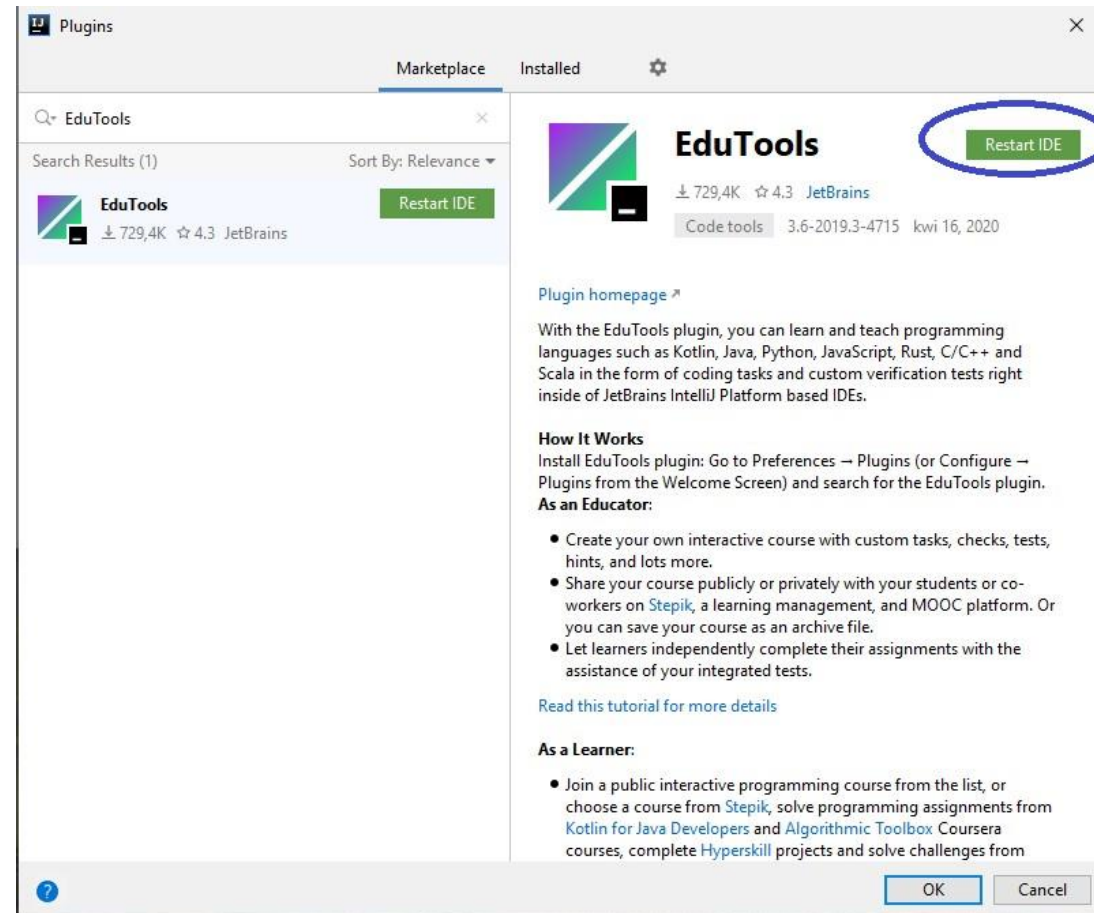

and then *Plugins*:

On the next screen choose *Marketplace*, type **EduTools** in the search bar, and choose *Install*:

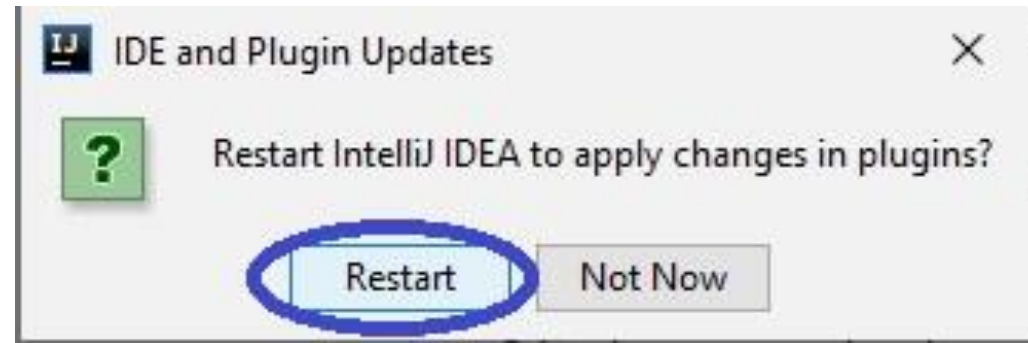

After the installation you need to click *Restart IDE*:

and *Restart*:

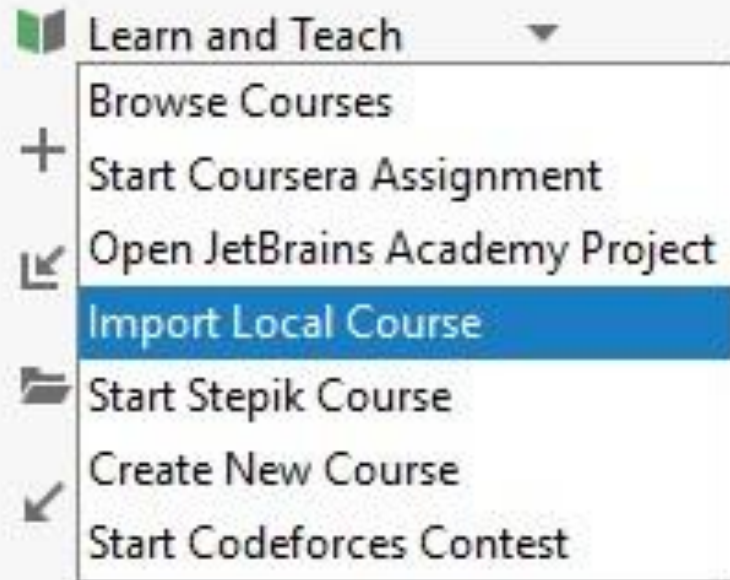

After a while we will see the IntelliJ screen with the new *Learn* and *Teach* option. Click on it:

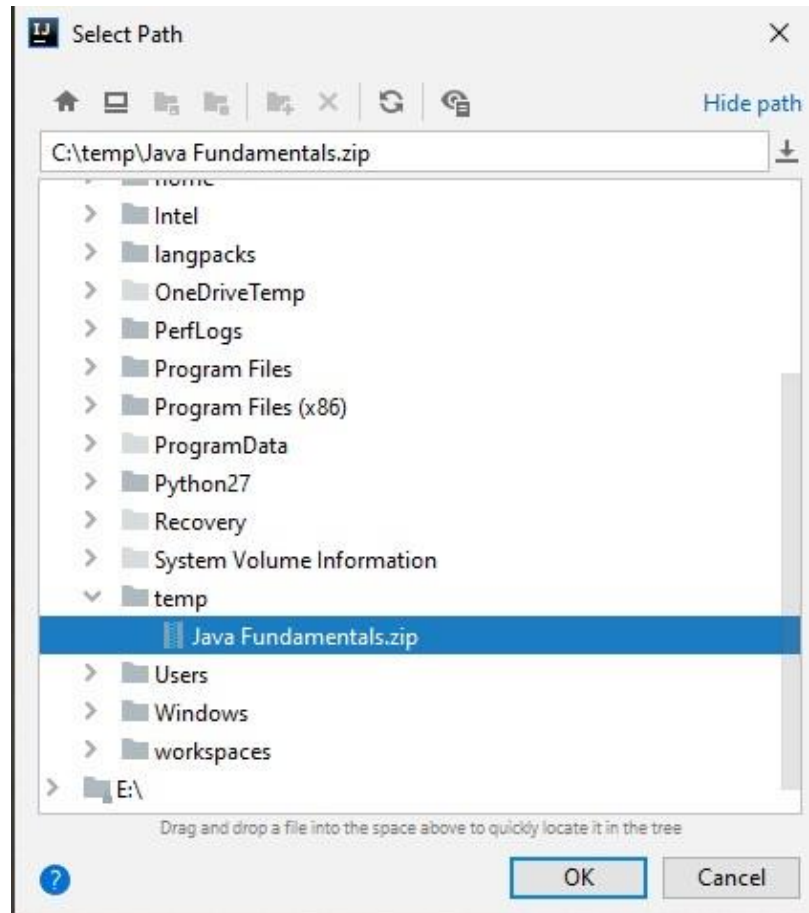

**And select the *Import local course* option:**

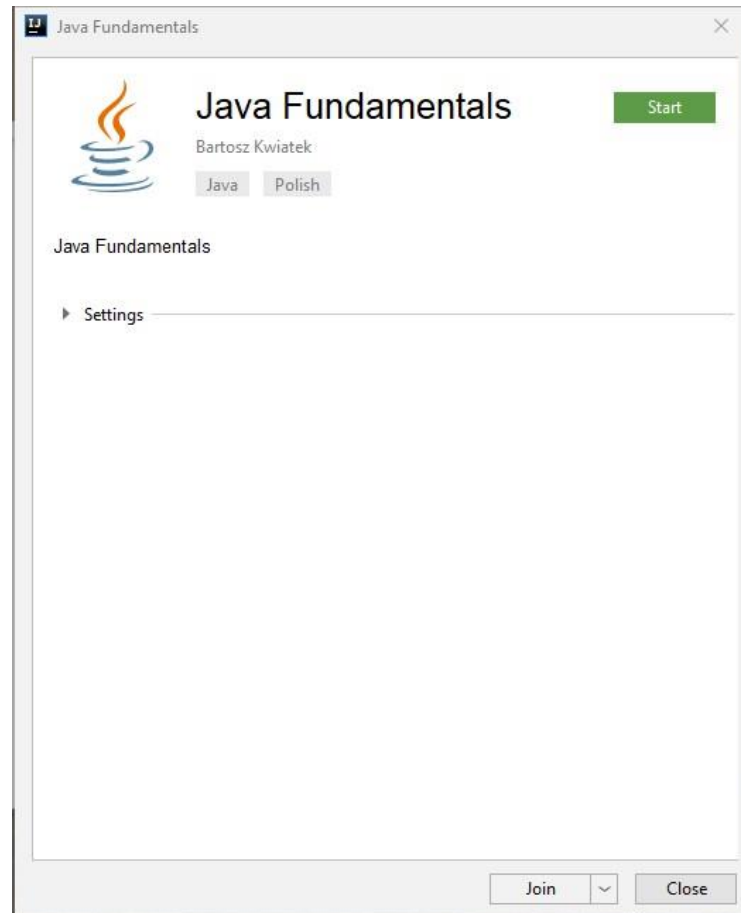

Select the downloaded file on the disk. In this case it's "C: \ temp", but your path may be different - it depends where you put the file.

After selecting the file, press OK.

You will see the following screen:

Then

If necessary you can expand "Settings" and set the JDK location, if you want to use a different one ... Click *Join*.

*Done!*
